b. Request by Office of Security for production of film dealing with destruction of materials. [] of OTR met with [], Office of Security on Tuesday, 23 November, to discuss the requirements for production of this film. It was determined that some of the equipment to be photographed would not be available for two-three months. Therefore, it was decided that actual production would take place at [] in early Spring. No script will be required. The voice-over narration will be written by [] after photography has been completed.

c. [] attended a demonstration at the Pentagon of a new technique in film production, which involves simultaneous use of a movie and TV camera. This system permits, among other things, immediate viewing of exposed film via video tape, making it unnecessary to wait several days to view results on a work-print. Further research will be required to determine whether or not further consideration should be given to use of this concept in our operations.

d. Footage filmed of Sir Charles on 3 November - Two prints of this footage have been received from the laboratory. The results are generally quite satisfactory. Steps are being taken to shoot and add titles to the film and make minor editorial changes. Requests to view this footage should be directed to my office.
